Good, fair Sea Org discipline, and LRH justice policies have been undermined by a counter-policy in effect on this base for several years. That counter policy is negotiating with and keeping SPs cooled off instead of dealing with them in accordance with HCO PLs and LRH ED 9 Gold; and thus awarding SPs for suppressive acts and protecting them in positions from where they can wreak havoc.

Recent rollbacks revealed the source of special treatment being given to SPs. It started with Marty Rathbun blowing the Sea Org on November, 1993. Marty took advantage of a number of false reports he had put in place over years giving a false picture as to his role in handling external attacks and the IRS in particular. It was against that false picture of contribution and the security consideration that his having left at that time could have endangered the IRS settlement, that Marty covertly negotiated a deal to keep his blow quiet and avoid the RPF in returning to the SO. The web of lies that allowed that arrangement to stay in place is so complex it would take pages to recount. Suffice it to say refer to a passage from Science of Survival:

"At 1.1, truth receives her severest drubbing; for here truth is confused, upset, used and twisted, hidden for fear somebody may make retaliation, until one understands that data from this level of the Tone Scale has only two purposes: to wreak the most harm upon others and secure the greatest safety for self. Here we have lies used to hide lies amid the most frantic protestations of honesty and noisy advertising campaign about the ethics of the speaker. Beneath the façade of honor, honest, ethics and "one's sacred word," one is apt to find a writhing cesspool of vicious and malicious lies calculated to do the greatest possible harm."

Marty then engaged in a campaign to covertly and systematically take out and undermine any executive or staff who might expose him. He did this through abusing his privilege to act as a security checker in a trainee capacity under RTC. He began the out-tech practice of sec checking people with no formal session set up, and brow beating hair-raising confessions out of them. This resulted in the undermine of at least the following executives, [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED], [REDACTED].

Marty concurrently subjected the base to widespread suppression by means of giving special treatment to SPs who were under his charge to handle. This has put cross orderers and enturbulative sources into positions from which they wreaked havoc, and it also undermined discipline and policy on the base.

Marty authorized [REDACTED] to destroy several auditors and enturbulate numerous Gold staff in the year 1997. [REDACTED] blew after chopping up her fourth auditor. Marty brought her back to HV where she lived alone for several months at the Campbell house. He allowed her into the RPF knowing she was not really up to going on the same terms as everyone. He briefed RPF I/C to be careful with her which lead to her being let off the hook when enturbulating others or engaging in destructive programming and correction. This lead to disintegration of discipline on the RPF, lowering of ethics and technical standards, and a failure of the program to graduate volume products. Marty then vouched for her reform and that she was a full product of the RPF, and had her posted as D/CO Personal Office CMO INT. The destructivity of that action has been well chronicled to the base since.

Marty took over the handling of [REDACTED] in August 2000. It was evident [REDACTED] was enturbulating everyone in slight and defying any and all authority on the base. Marty cross ordered tech and policy and decided to audit out the aberration rather than allowing group justice to take its course. [REDACTED] was subsequently allowed to chew up auditors (including [REDACTED], [REDACTED]) and Security staff members. Marty covertly allowed [REDACTED] back on the base without authorization – giving the impression he was authorized at the highest levels. [REDACTED] then started enturbulating the entire Audio division and began a covert campaign to undermine CO CST. [REDACTED] blew when confronted by CO CST. Marty "recovered" [REDACTED] in LA and covered up for [REDACTED] insisting [REDACTED] had only gone to LA to continue working on his project from there. [REDACTED] then spent another six weeks systematically enturbulating base staff members. With Marty away from the base, and no longer there to protect [REDACTED], [REDACTED] blew the Sea Org for good on 31 August.
