VI. Overall Safety Assessment

VII. Summary/Findings Implications

During the course of the investigation information was gathered from the victim, the alleged perpetrator, the superintendent, the assistant superintendent, the Inspector General investigator, the probation officer supervisor, the internal investigator, three other staff members, twenty seven offenders, two kitchen staff members, CPT and law enforcement. Based on the information provided, there are Verified Findings of Bone Fracture and No Indicators of Physical Injury. It should be noted that there are no indicators of physical injury because the code of Bone Fracture took its place. There are consistant statements from the victim as well as multiple other offenders that reported that staff member Glover put [REDACTED] in a choke hold which is a violation of DJJ policy and an unapproved hold. According to CPT, this maneuver by the staff is excessive and resulted in the injury to [REDACTED] jaw. There are also concerns that staff member Glover had repeated interaction with both offenders and other staff members about this investigation, even prompting an offender to ask around to see if he could figure out anything. This is highly inappropriate as the staff members are advised to not discuss their ongoing investigations at all. Also, Mr. Glover was on no client contact however was passing messages through a staff member, Mr. McClemma, to offenders regarding this investigation. It is felt that Mr. Glover made poor decisions both during the attempt to restrain Sanders and afterward by violating multiple policies during the investigation. [REDACTED] has gotten the medical attention that was needed and the facility has handled the matter appropriately, by putting Mr. Glover and no client and then administrative leave.
